

NAVCDP
Security Management Plan (SMP)

ANNEX G: SECURITY MANAGEMENT PLAN (SMP)

Objective of the SMP: To provide and maintain a safe physical environment and manage staff activities to reduce the risk of personal injury and property loss during the implementation of the National Agricultural Value Chain Development Project (NAVCDP). The plan describes how security will be organized to face identified threats and how to be continuously reassessed and reorganized in correlation with security situations and operations being undertaken. The SMP covers sub-project activities in Component 1, 2 and 3 as well as project management and coordination under Component 4.

A. Security Approach

The NAVCDP National Project Coordinator (NPC) will ensure that security procedures and criteria are fully designed and updated, and the means fully available to ensure the security for project operations.

The NPC will also leverage in using the existing national and local security infrastructure to access and share security and conflict related information. In addition, and working with the National Police Service (NPS), NPC will specifically address conflict risks in community engagement activities in timely manner and to identify any security risk that can pose a threat to Project staff and assets both at the National and County coordinating units.

The micro-projects initiated by CIGs/VMGs and medium level FPO investments (Component 1) and the value chain/infrastructural investments (Component 2 and 3) will be implemented in areas within the beneficiary communities. The CIG/VMGs will use the locally available security personnel while the FPOs and project management committees for value chain/infrastructural investments will deploy security staff to guard the investments. The implementation committees for all the sub-projects will inform the nearest police officers for support in case of any emerging security threats they cannot handle.

B. Standards and Good International Practice

This security management plan is anchored on (a) World Bank Environmental and Social Standard 4 (ESS4) that covers Community Health and Safety on sub section (b) Personnel Security in line with the World Bank Good Practice Note on Assessing and Managing Risks and Impacts of the Use of Security and (c) the Guidelines for Implementation of the UN Basic Principles on the Use of Force and Firearms by law Enforcement Officials.

The standard role of the Public Security Agencies will be to maintain the rule of law, including safeguarding human rights and deterring any actions that will threaten the project personnel and facilities. The Public Security agents to be deployed when needed will be competent, appropriate, and proportional to the threat. Government of Kenya will adopt the World Bank Good Practice Note on Assessing and Managing Risks and Impacts of the Use of Security to comply with the commitments on human rights extended throughout the NAVCDP activities and bolstered by its compliance with:

**NAVCDP
Security Management Plan (SMP)**

- Voluntary Principles on Security and Human Rights Toolkit Version 3, 2008,
- Guidelines for Implementation of the UN Basic Principles on the Use of Force and Firearms by Law Enforcement Officials, 2016,
- The Penal Code 2016,
- Prevention of Terrorism Act 2012,
- Prevention of Organized Crime Act 2012,
- Counter Trafficking in Persons Acts 2012,
- Independent Policing Oversight Authority Act 2011,
- National Police Service Act, 2014
- Private Security Regulation Act, 2016
- The National Government Coordination Act 2013
- Kenya Police Service, Service Delivery Charter, 2015, and
- The Universal Declaration of Human Rights, 1948.

C. SECURITY MANAGEMENT

NPC will be responsible for project security management at both National and County levels under the direct oversight and guidance of the MoALFC as the implementing agency. MoALFC will work closely with the Ministry of Interior and Coordination of National Government in the deployment of the public security officers to the project based on the security risk assessment. The command and communication structure of the National Police Service will be adopted. The police service shall perform its functions under the overall direction, supervision and control of the Commissioner of Police at National Level and County Commissioner at County level and Officer Commanding Police Division (OCDP) at Local Level. The management of security for NAVCDP operations will comply with the four basic pillars of security management:

- DETECT an adversary.
- DETER an adversary if possible.
- DELAY the adversary until appropriate authorities can intervene.
- RESPOND to the adversary's actions.

D. OVERVIEW OF THE SECURITY SITUATION

Different security risks exist in the selected NAVCDP counties, that would be new or changing which may impact the project, that must be communicated without delay through the relevant designated project liaison officers at National, County and Community levels. The project liaison officers are expected to record the identified risks in the security log. The security risks can be categorized into:

- a. Internal Risks may include but not limited to: -illegal, unethical, or inappropriate behaviour of project personnel or those directly affiliated with it, such as employee theft, workplace violence, and labour unrest, potentially with associated sabotage).
- b. External Risks are those caused by the actions of people outside the project who seek to take advantage of opportunities presented by the development and operation of the project, such as common criminal activity; disruption of the project for economic, political, or social objectives; and other deliberate actions that have a negative impact on the effective, efficient, and safe operation of the project. In extreme cases, these could include banditry attacks, terrorism, armed insurgency, coups, or war.

NAVCDP Security Management Plan (SMP)

The main security risks within the NAVCDP Counties include:

1. Criminal offences
2. Banditry attacks
3. Terrorism
4. Cattle rustling/Inter-tribal or communal violence which could pose a threat to project personnel
5. Industrial Action leading to strike or disruption of work, social conflict, civil unrest
6. Breakdown of relationships with Community groups and Committees
7. Reaction of community to an incident or accident involving project personnel or asset
8. Threat of armed attack
9. Theft/ Larceny; and
10. Kidnapping

The project has adopted a systematic and careful examination of the workplace, work activity, working environment and those people who may be at any security risk. Risk assessments shall identify what might go wrong and with an evaluation of any security hazards undertaken, adequate control measures needed to prevent or minimize the potential security risks will be determined.

A consequence risk assessment matrix has been adopted comprising of the impact and likelihood of potential security risks (Table I-1). The matrix works by selecting the appropriate consequences from across the bottom, and then cross referencing against the row containing the likelihood, to read off the estimated risk rating.

Table I-1: Risk Assessment Matrix

		Impact →				
		Negligible	Minor	Moderate	Significant	Severe
Likelihood ↑	Very Likely	Low Med	Medium	Med Hi	High	High
	Likely	Low	Low Med	Medium	Med Hi	High
	Possible	Low	Low Med	Medium	Med Hi	Med Hi
	Unlikely	Low	Low Med	Low Med	Medium	Med Hi
	Very Unlikely	Low	Low	Low Med	Medium	Medium

The Likelihood verses Consequences Risk Assessment Matrix has been supported with a table which ties together the risks with the mitigations, roles and responsibilities and timelines and the security situation analysis for the 26 Counties see Table I-2:

**NAVCDP
Security Management Plan (SMP)**

Table 1-2: Project Security Risks and Mitigation Measures

S. No.	Risk description	Likelihood of the risk occurring	Impact if the risk occurs	Severity Rating based on impact & likelihood. 7	SEAH, and incident response	Low	Low	Low	National Project Coordinator	Adhere to all provisions in the Project Grievance Redress Mechanism Abide by the requirements of SEAH Action Plan for the project being prepared,	Continuous SEAH awareness creation the hired firm.		NAVCDP Grievance Mechanism NAVCDP SEAH Action Plan

Table I-3 provides an overview of the security situation analysis for the 26 project participating counties for various potential security threats such as theft, cattle rustling. From the geographical risk assessment, NPC will leverage this process to determine which locations require National Police Service, armed security support and, importantly, which do not.

Table I-3: Situation Analysis Matrix for the security within the project counties

#	SECURITY THREATS PROJECT COUNTIES	Criminal offences	Theft/ Larceny	Terrorism	Cattle rustling	Armed attack / Kidnapping	Industrial Action	Community Hostility	SEAH, and incident response
1.	Kitui	Medium	Medium	Medium	High	Medium	Low	Low	Medium
2.	Machakos	Low	Medium	Medium	High	Medium	Low	Low	Medium
3.	Migori	Medium	Low	Medium	High	Medium	Low	Low	Medium

NAVCDP Security Management Plan (SMP)

In the Counties with low risk security threat, the project could consider using private unarmed security personnel. Due diligence involving back ground checks can be undertaken to ensure that only those from reputable security firms are engaged. The unarmed security personnel can undertake basic security duties such as access control and perimeter security management; and if deemed necessary, the police may be engaged on a reactive basis. This approach will alleviate undue pressure on local policing resources and reduce the risks of engaging armed officers. An appropriate, formal agreement will be developed to support service delivery and mitigate the identified security risks and respond to any stakeholder concerns.

NB: Care will be taken to ensure that security response or presence of security forces will not result in additional risks to communities or individuals within the project implementation areas.

1. Social Conflicts, Civil Unrest

The main risk is the general population including the local communities, who presume to have been aggrieved that would mobilize crowds that may include villagers for a demonstration. Compensation and environmental as well as social concerns can create this kind of scenario. Most of the time, negotiations facilitated by local leaders and government entities can resolve the situation but some can escalate leading to violent actions.

Any indications of such a threat must be communicated through the project local liaison officers to the designated field police officers and complaints may be made to the officer-in-charge of a Police Station (Officer Commanding Station - OCS) and be recorded in an occurrence book for future reference. The threat should in turn be communicated to the Officer Commanding Police Division (OCPD) at the sub-County level and to the County Commander of Police using the existing public security channels.

National, county, and local workers could also demonstrate, if there is a perceived discrimination and unfair working conditions in terms of wages, overtime, and welfare. It is the responsibility of Ministry of Agriculture, Livestock, Fisheries and Cooperatives (MoALFC) and the NAVCDP coordinating team to ensure that working conditions for all workers/employees are in line with the National legal framework.

2. Criminal Offenses

The main risk remains small scale thefts of light equipment, fuel and personal effects which can involve aggressions. To mitigate this risk, materials storage and control, inventory and maintenance of storage areas for raw materials, equipment, etc. will be according to the national laws and regulations and relevant good international industry practice, including the World Bank Group Environmental, Health and Safety Guidelines.

3. Terrorism

There is the ever-imminent threat of terrorism from the lawless Al-shabab from neighbouring Somalia in the northern counties that could pose a serious threat to the implementation of the NAVCDP activities. None of the project counties lies along the Somalia border. However, the project stakeholders will be on high alert to avoid incidences of infiltration of the terrorists into the project areas. The stakeholders will also be sensitised to report any situations that may indicate signs of an attack from the terrorist groups.

NAVCDP
Security Management Plan (SMP)

4. Cattle Rustling

Nomadic pastoralists in Northern Kenya are also known to be armed and would pose a security risk to the smooth implementation of the NAVCDP activities, especially if incidents of cattle rustling etc increase conflict between communities. However, the Counties from Northern Kenya are not participating in this project and red meat (beef, sheep and goats) is not a priority value chain.

5. Armed attacks and kidnappings

The project stakeholders may be exposed to this risk where the project personnel will be expected to carry huge sums of money or valuable items. The stakeholders will be sensitised to use cashless transactions as much as possible. Where risks may be high, the armed security teams may be called upon to provide escort to the destinations.

6. SEAH

The risk of SEAH in the project activities/operations is expected to be medium and all stakeholders especially the girls and women will be sensitised on how to avoid such incidences and the correct steps to take and channels to use to report in case they face the are affected. The project GM will also have a dedicated channel to handle SEAH incidents.

E. ALERT STATES

MoALFC will adopt the NAVCDP project area alert status in evoking the security state response levels, triggers, and actions specific to the project site. Table I-4, I-5, I-6 and I-7 with the color shades of Green, Yellow, Orange and Red respectively are the security level responses to be adhered to.

**NAVCDP
Security Management Plan (SMP)**

Table I-4: Security Response Level: Green- Business as Usual- Security Risks Effectively Controlled

Security Response Level GREEN Business as Usual- Security Risks Effectively Controlled	
Event Indicator	Recommended Action(s)
<p>No direct threat exists, and no incidents have taken place to warrant heightened security measures: This is the default threat level. There is no current, general, or undirected threat to government supported works projects within the County. Under this level the status remains at GREEN.</p> <ul style="list-style-type: none"> • Site operations are running normally with employees going about their lives with no, or very limited, restrictions. • There are no restrictions on vehicle movement or crew changes • Peaceful protest demonstrations take place. • Occasional unrest or demonstrations away from operational sites. No direct threat to the operation • Effective government control and/or rule of law in place. Liaison remains regular and effective • Continued good will of the majority of the local community remains assured 	<p>No restriction to normal movement compliant with local Journey Management Plan (JMP) requirements. Staff and vehicles may move around the area within the protective envelope of the project area security.</p> <ul style="list-style-type: none"> • Complete all pre-planning actions • All visitors or returning staff receive an arrivals Security brief • Train staff and ensure awareness of actions to be taken- site drills. • Ensure JMP is in place and followed • All crisis management and evacuation plans are in place and are maintained as ‘living documents’ • The security situation, crime levels, political and social events are monitored closely. On-going collection and assessment of information through liaison with authorities and local community, • Ensure daily Personnel on Board (POB) is maintained. • All stakeholders are aware of the contents of the evacuation plan and understand their role within it • Vehicle Escorts taken when traveling to areas where civil unrest or cattle raids has occurred. • Maintain close liaison with social safeguards and good community relations
STANDARD OPERATING PROCEDURES

Security Management Plan (SMP)**

Security Response Level

RED

Cease Operations and Lock Down or Evacuate Site

These actions apply to ensure the project area and camps are locked down to maintain the security of the core staff, whilst the NAVCDP Incident Management Team decides on the final course of action. Increased Actions:

Police Foot Patrols:

- Main gate sentry reinforcement.
- Intensify inner perimeter patrols.
- POB confirmation.
- Conducting thorough searches at the main gate.
- Ensure all exits are padlocked.
- Reporting suspicious activities to the control room.

Centralized Mobile Police Patrols:

- Inner perimeter fence 360 area check.
- Ready to react to emergency.
- Main gate and emergency exit manning.
- Will be ready for escort tasks.
- Questioning strangers or suspicious persons or vehicles.
- Developing hearts and minds assurance.

Camp Sites:

- Main gate and all access routes closed and secured with vehicle entry prevention devices. This is in addition to vehicle tyre spikes.
- No access allowed unless authorised by security management. If authorized Red measures apply and all vehicles are searched comprehensively.
- No vehicle is authorised to move in or out of the perimeter unless directed by the security advisor.
- Static guards reinforced by armed police or military if available. All perimeter patrols and main gate to operate with an armed presence as well as the unarmed guard.
- Wider patrolling only as situation requires, as this will be done with coordination of any military presence.
- Perimeter is secured so internal and external patrols are stopped to provide manpower to reinforce the perimeter security.
- Internal security patrols to ensure direct observation on the perimeter at all times.

NAVCDP Security Management Plan (SMP)

Alert levels provide specific guidance on recommended security measures and actions to be adopted on the basis of the prevailing security situation. It is anticipated that local or regional events (triggers) will be monitored daily and linked to the alert status. All the available security information will be assessed to ensure early identification of increases in risk which may require a change in alert state. Changing of rating level will be done on instruction from the NAVCDP project office.

E. ALERT STATE STATUS BOARDS

Alert State boards are to be displayed at the camp and indicate the current security alert state and associated restrictions to movement in the project area. Movement restrictions are to be covered in Journey Management Plan.

F. SITE SECURITY LAYERS

All project facilities will undergo the following security layers/protocols.

- i. Physical security (guards).
- ii. Access control system.
- iii. Intelligence Network.
- iv. Security induction.
- v. Awareness.
- vi. Trainings.

The combination of the different security layers will reduce the risk of having one system being by-passed.

1. Physical Security

Physical security will involve the use of security barriers, such as fences, gates, locks, guard posts, surveillance/electronic security systems at all the project premises (project investment offices, sites).

Security barriers

These will mainly comprise of fences, gates, guard posts, surveillance / electronic cameras which will be manned by trained personnel who shall document and record daily incidents at the various points and provide reports to their superiors for appropriate action.

2. Security operating Procedures

This shall entail some of the key security operating procedures which will comprise of:

- **Boundary security:** Security will maintain control of the project's perimeter by deploying personnel at strategic points along the boundaries of the project facilities and also channel people to access-control points that will have security personnel (both armed and unarmed as well as those in uniform and non-uniformed personnel);
- **Access Control Policy and Procedures:** Access to project sites will be through a formal, documented access control procedures to facilitate the implementation of access control policy and associated access controls. MoALFC personnel will be issued with badges and will at all times carry and display these badges when in the field. The badges will enable the bearer to access project facilities upon site security enquiry. Visitor badges will be issued to all visitors who are not employees of MoALFC.

NAVCDP
Security Management Plan (SMP)

- **Unexpected / Unplanned Visitors:** In case of unexpected (unplanned) visitors, the OCS will be notified immediately by the security officers. Access endorsement/authorization will be issued only by the OCS after consultation with the Project Coordinator, and thereafter a visitor's badge will be issued. The visit will not exceed the time agreed upon during access authorization and they must be accompanied by the project personnel /staff in charge of the visit.
- **Visitor Badge Process:** Visitors badge will be issued after the visitor has been authorised by the site project personnel/staff. The visitor will then fill a visitor form providing all his/her details and purpose of the visit. A visitor's badge will then be processed and issued by the Access control office. Security induction must be done before the badge is issued to the applicant and the visitor must sign on the induction document for acknowledgement. A data file with information regarding the visitor will be recorded and kept in the site access register.
- **Luggage search:** A search of personal luggage will be performed by the guards at the access control point to ensure all prohibited items such as alcoholic beverages, firearms, knives and dangerous drugs are not smuggled into the project facilities.
- **Vehicle Access Control Procedures:** All Vehicles accessing project facilities will only have a driver and should undergo a security check/search for prohibited items i.e., alcohol beverages, firearms, knives, explosives and dangerous drugs. The driver must also declare the entire luggage at the main gate (personal luggage) for checking.
- **Materials Storage and Control:** where applicable, the project will institute controls over the transport, inventory, and maintenance of storage areas for raw materials, equipment, etc. Note that these are stored in accordance with appropriate Kenyan national laws and regulations and relevant good international industry practice, including the World Bank Group Environmental, Health and Safety Guidelines.

Decision tree model: the project security shall adopt a structured approach using the collaborative approach for all the armed security operatives in prioritizing the collection of relevant data during incident response. The structured tree model approach will help to define how questions are answered and allows the incident response team to respond consistently with predictable results. The structured approach also provides for definable, reproducible structures to be created facilitating controlled cost exposure during an incident response cycle.

- **Information and Communication:** The project will detail procedures for categorizing, handling, and controlling sensitive information. County Policing Authorities and Community Policing Committees are part of community policing, which improves the transparency and accountability in service delivery to the community. The reporting mechanisms include: using of the emails: incidents@ke-cirt.go.ke; info@dcicpu.co.ke and the toll-free numbers: call 116,112 and 999.

In cases where a report should be made against the security teams (Police), the documented channels of receiving complaints at National Police Service Internal Affairs Unit (IAU) are:

- a. Visiting the nearest police stations,
- b. Through letters P.O Box 1880 -00200 Nairobi,
- c. Through-email-iau@nationalpolice.go.ke,

NAVCDP
Security Management Plan (SMP)

- d. Social media – Twitter - @ NPSOfficial-KE,
 - e. Anonymous Reporting Information System (ARIS) USSD *683#, SMS 40683, Toll Free Line 0800721230, Mobile App ARIS, NPS, & Web Form www.iau.go.ke,
 - f. Mobile +254 798474619,
 - g. WhatsApp (Videos and Pictures) 0758729917, and
 - h. Through the media.
- **Code of conduct** (Police Act 2010, Cap 64). Every police officer shall be subject to Force standing orders and to the provisions of the Code of Regulations for the time being in force, so far as the same are not inconsistent with the provisions of this Act or of any regulations or standing orders made thereunder.
 - **Firearms Security:** The project will develop a policy regarding firearms on-site, as well as the responsibilities and procedures for issuing and storing any security firearms, ammunition, and non-lethal weapons. This shall include location for storage; how weapons are properly secured during storage; records for issuance; who they may be issued to; safeguarding while in possession of the personnel; and audits.
 - **Special Situations:** There may be instances where large-scale events (e.g., criminal activity, demonstrations, civil disorder) require interventions by public security which is not specifically associated with the project. When planning for such events or emergencies, there shall be clarity on how project security passes control over to formal public security (for example, police, military, emergency responders in line with the National Police Service procedures in conjunction with the project established decision tree in armed police incident response. This will involve also collaborative and or leveraging with the existing projects being implemented within the project areas.

G. SECURITY SUPERVISION AND CONTROL

The project will have a clearly defined management structure and responsibility, including overall lines of control, accountability, and supervision for the security effort. In making such arrangements, the project will be guided by the principles of proportionality and GIIP, and by applicable law, in relation to hiring, rules of conduct, training, equipping, and monitoring of such security workers. The project will seek to ensure that government security personnel deployed to provide security services act in a manner consistent with paragraph 24 of ESS 4 and encourage the relevant authorities at County and National level to disclose the security arrangements for all facilities to the public, subject to overriding security concerns.

The Project coordinator will (i) make reasonable inquiries to verify that the direct or contracted workers retained by the Ministry to provide security are not implicated in past abuses; (ii) train them adequately (or determine that they are properly trained) in international human rights standards or minimal use of force techniques (less use of firearms), and appropriate conduct toward workers (in line with the Labour Management Plan) and affected communities (in line with SEAH Action Plan); and (iii) require them to act within the applicable law and any requirements set out in the ESCP.

All incidents including thefts, attempted, attempted break-ins must be reported to the OCS and recorded in the occurrence book, who will initiate an investigation to determine sequence of events, what may have contributed to the incident, probable cause (s) and contributing factors), and recommendations, corrective actions, and mitigation measures (based on investigative

**NAVCDP
Security Management Plan (SMP)**

findings) – an incident report will be issued to the Project Coordinator with details of the above actions.

There shall be a broad agreement at the national level, and there after communicated to the local level where it is more likely and achievable, with each local Officer Commanding Station. This will include the specific project requirements such as stakeholder engagement, security arrangements disclosure, incident response, and grievance management would benefit from being formally agreed with the appropriate authorities in line with the Project Stakeholder engagement Plans and Grievance Mechanism (GM).

Depending on the security incident, the Project Coordinator will decide as to whether there is need to inform external agencies of the security incident. Project organization will require security personnel to manage security aspects;

I. Security Organization

All security activities are supervised and coordinated by the OCS on behalf of the Project Coordinator. The organisation of security responsibilities, authorities and communication process shall follow Government of Kenya (GoK) organisation from project management down through the project staff when reporting security breaches or vice-versa as the case may be.

County Project Coordinator is the responsible person for the operations on site and he is accountable of the actions by security personnel in charge of site security.

Security Team/Officers (National Police Service, the National Youth Services, and the Kenya Wildlife Service) may be appointed to oversee specific security activities for project sites (storage and lay down areas, work sites, field transportation and day to day operations). They will supervise such activities and report directly to the Project Coordinator. In addition, the NPC will work closely with the National Police Service to develop a set of project related messages and in line with the project stakeholder engagement plan to be aligned with the broader project engagement security plan designed to promote the rule of law, discuss security arrangements, and elicit responses from key stakeholders. Project security team shall draw valuable insights and the structure of the key security messages and methods of engagement for each of the six major security stakeholder groups including the Employees and contractors, Government, Police, Communities and the Non-Government Organizations or Civil Society Organizations from the GIIP (VPSHR⁴) (Section V, Stakeholder Engagement).

All project personnel are required to be aware of the need for constant vigilance, care and compliance with security procedures, as well as the necessity to report any incident or suspicion to the OCS.

Officer Commanding Station (OCS): Security personnel; the police will be deployed to provide security to all project sites and facilities to be headed by OCS. The police officers have been trained on the following specific topics; securing project sites, patrols, communication, use of radio call units, Quick intervention, and access control procedures. They are professional

NAVCDP Security Management Plan (SMP)

with a very good appearance and good English and Swahili command in terms of spoken and written. Their roles and responsibilities are detailed below: -

- To Implement the Standard Operating Procedures properly without fear or discrimination.
- To ensure respect of the access control procedures and make sure that they are applied to all project personnel.
- Perform interior Patrols days and nights to ensure that the national borders are intact or no intruders within the project facilities.
- Check the border status on a regular basis using back tracking security method.
- To report any security incident to the guard posts or security commanders.
- Maintain constant communication with the control room on hourly basis while on duty.
- Report to the control room in case of any technical issues.
- Ensure a proper behaviour at all times while applying the SOP; avoid exchanging of words with the project staff.

Security Community Engagement: The results of the security community engagement and security risk assessment process (**see Table I-3**) shall be further examined by the relevant parties and appropriate mitigations included in a project level Memorandum of Understanding (MoU), setting out a framework for cooperation and setting standards and expectations. Key clauses for drafting MoU have been adopted from the DCAF/ICRC Knowledge Hub⁵ and customised to suit the project including:

- Building trust among relevant government stakeholders especially the County Government and Ministry of Interior and Coordination of National Government, NGOs, civil society and community members to prepare the ground for a meaningful MoU,
- Adherence to the provisions contained in the VPs (Voluntary Principles on Security and Human Rights) and the UN Code of Conduct for Law Enforcement Officials and the UN Basic Principles on the Use of Force and Firearms by Law Enforcement Officials (see Section K),
- Institute a vetting procedure to ensure that no one allegedly implicated in past human rights and international humanitarian law abuses (i.e. there is a conviction, pending case or very strong evidence) provide security to the company.
- Institute a training programme, for public security forces assigned to the project operations (See Section G Paragraph 2: Training),
- Develop an acceptable protocol to manage equipment transfers in a manner that aligns with the VPs.
- Operationalize acceptable modalities for project contributions to salaries, goods or services, if applicable, based on the risk assessment from time to time,
- An agreed system of information-sharing around security issues, with due regard for necessary Confidentiality,
- Have a commitment to a collaborative working relationship with the joint objective of respecting human rights and international humanitarian law.

⁵ *Addressing Security and Human Rights Challenges in Complex Environments*

NAVCDP
Security Management Plan (SMP)

Other softer measures to be included in the MoU include the camp access protocols, grievance mechanisms, engagement commitments that can, without concern for confidentiality, be made publicly available in order to build trust and or promote cooperation.

H. JOURNEY MANAGEMENT

NPC has the overarching responsibility for project-wide journey management. This is delegated to the County Project Coordinator who will monitor all staff in while in the field through the journey management system in collaboration with the County social safeguards compliance officer. A journey management log is to be maintained at the control room whereupon vehicle movements are logged and monitored. This will be shared with the County and National PCU safeguards team by email.

Project staff will be required to complete a Journey Management Plan form, which has to be authorised by the project Coordinator and inform the Control Room on arrival and departure to update the POB.

I. COMMUNICATIONS

A Radio network controlled from the Control Room under the direction of the OCS will be established at the camp in order to maintain control and to monitor the movement of personnel and vehicles within and around the vicinity of the camp.

Beyond the range of local radio nets, communication will be by mobile or satellite phone. Journey management will require periodic contact via radio or telephone in order to monitor the location of personnel.

The Control Room will be manned by English / Swahili speaking person who will be required to monitor all radio communications by day and whilst any project personnel are deployed at night.

The ASF are to be integrated into the communications plan in order to allow effective command and control and immediate reaction to emergency situations once sufficient assets are on site.

J. Security Grievance Mechanism

To extent possible, the SMP shall adopt the Project Grievance Mechanism in managing the security related grievances. The NPC shall engage the relevant project personnel to ensure security personnel grievances are included in the Project GM and Stakeholder Engagement Plan, and work with public security leaders to integrate the project GM with internal procedures.

Key areas of emphasis will be on the following steps:

- Step 1: Publicizing Grievance Management Procedures,
- Step 2: Receiving and Keeping Track of Grievances,
- Step 3: Reviewing and Investigating Grievances,
- Step 4: Developing Resolution Options and Preparing a Response,
- Step 5: Monitoring, Reporting, and Evaluating a Grievance Mechanism, and
- Step 6: Dedication of adequate resources both human and capital.

Grievances related to the security team shall adhere to the National Police Service Internal Affairs Unit (see section F of the SMP sub-section 2 bulletin 8) and the Independent Policing Oversight Authority to expressly deal with the matters. See Figure I-I below:

**NAVCDP
Security Management Plan (SMP)**

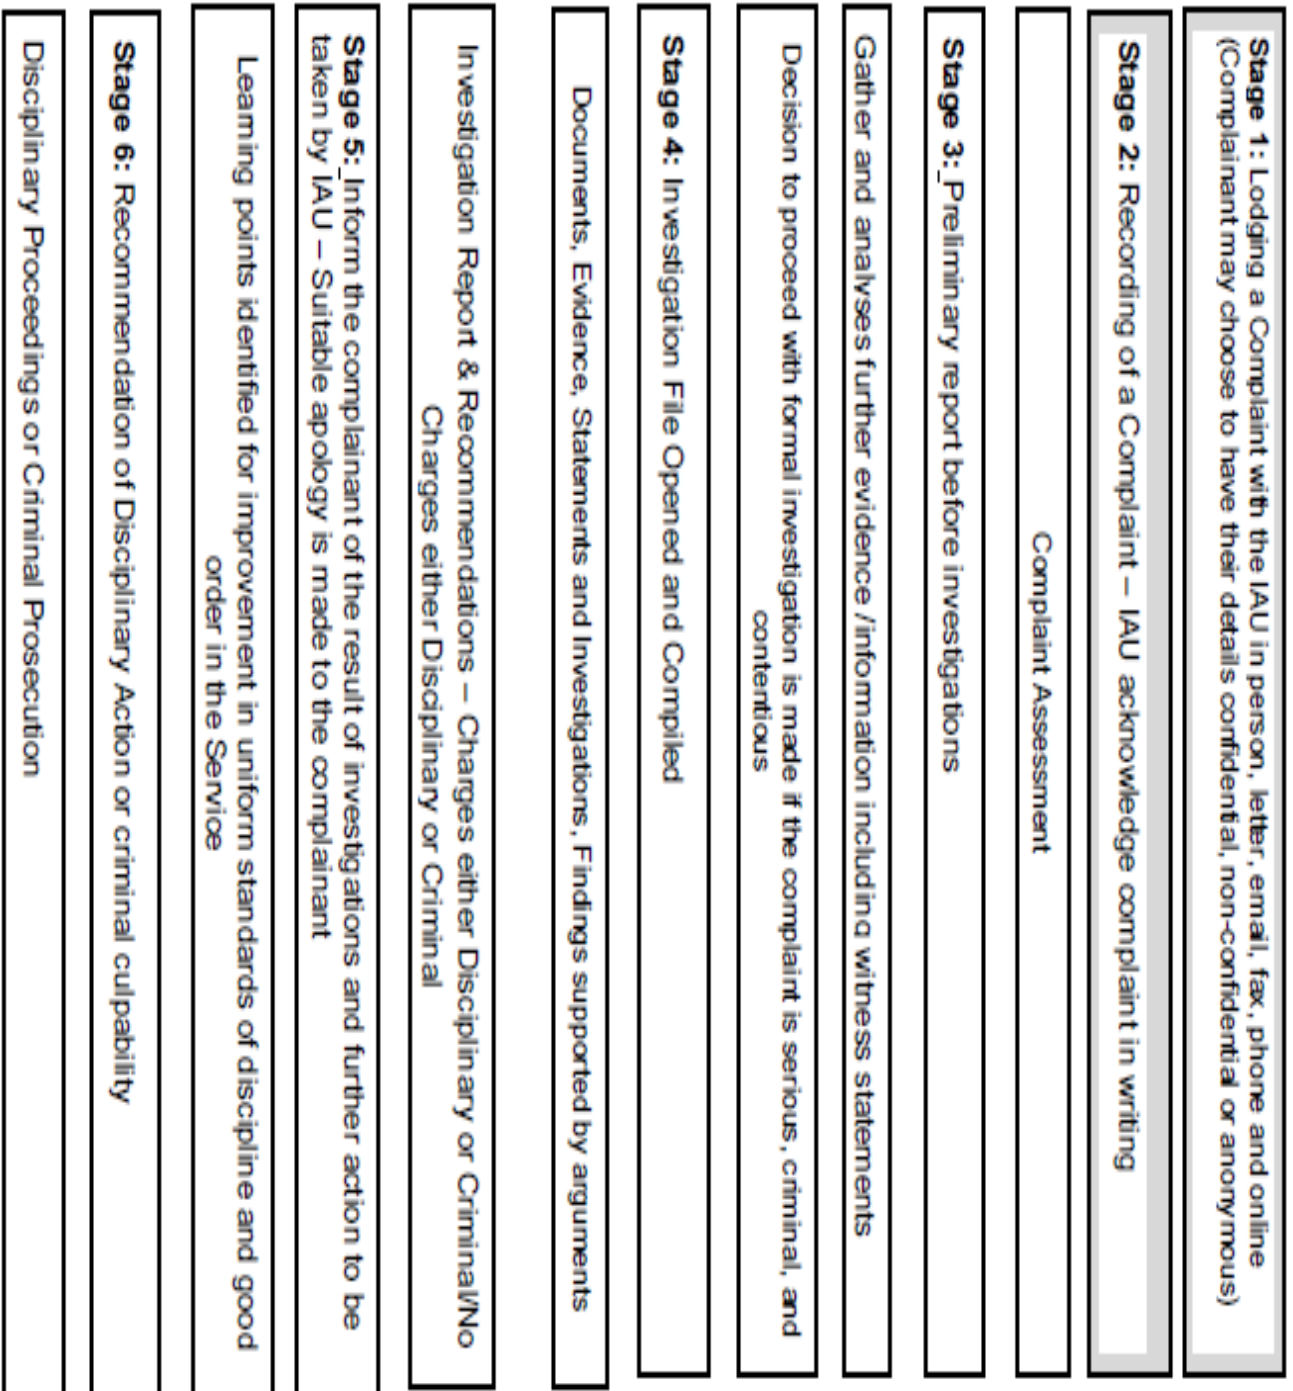

Figure I-1: National Police Service Complaints Management Process (Internal Affairs Unit-IAU)

NAVCDP
Security Management Plan (SMP)

K. Basic Principles on the Use of Force and Firearms by Law Enforcement Officials

The project has adopted the basic principles from the guidelines for implementation of the UN basic principles on the use of force and firearms by law enforcement officials. The guidelines promote the proper role that law enforcement officials must consider and require their respect by project implementers within the framework of Kenya national legislation and practice. The adopted principles and guidelines shall be brought to the attention of law enforcement officials as well as other project persons and include:

1. MoALFC and appointed law enforcement agency (National Police service) shall adopt and implement rules and regulations on the use of force and firearms against persons by law enforcement officials.
2. MoALFC and appointed law enforcement agency shall develop a range of means as broad as possible and equip law enforcement officials with various types of weapons and ammunition that would allow for a differentiated use of force and firearms.
3. The use and deployment of non-lethal incapacitating weapons shall be carefully evaluated in order to minimize the risk of endangering uninvolved persons,
4. Law enforcement officials, in carrying out their duty, shall, as far as possible, apply non-violent means before resorting to the use of force and firearms. They may use force and firearms only if other means remain ineffective or without any promise of achieving the intended result,
5. Whenever the lawful use of force and firearms is unavoidable, law enforcement officials shall:
 - a) Exercise restraint in such use and act in proportion to the seriousness of the offence and the legitimate objective to be achieved;
 - b) Minimize damage and injury, and respect and preserve human life;
 - c) Ensure that assistance and medical aid are rendered to any injured or affected persons at the earliest possible moment;
 - d) Ensure that relatives or close friends of the injured or affected person are notified at the earliest possible moment.
6. Where injury or death is caused by the use of force and firearms by law enforcement officials, they shall report the incident promptly to their superiors. A detailed report shall be sent promptly to the Internal Affairs Unit for responsible administrative review and judicial control,
7. MoALFC shall ensure that arbitrary or abusive use of force and firearms by law enforcement officials is punished as a criminal offence in line with National Police Service Internal Affairs Unit and the Independent Policing Oversight Authority,
8. Exceptional circumstances such as internal political instability or any other public emergency may not be invoked to justify any departure from these basic principles,
9. The appointed law enforcement agency shall ensure that all law enforcement officials are selected by proper screening procedures, have appropriate moral, psychological and physical qualities for the effective exercise of their functions and receive continuous professional training, and
10. MoALFC and appointed law enforcement agency shall undertake the policing of unlawful assemblies, policing persons in custody or detention in line with the provision of the UN basic principles on the use of force and firearms by law enforcement officials, 2016.

**NAVCDP
Security Management Plan (SMP)**

L. ALARMS

Alarms (Hand winding and electric sirens) for emergencies are to be held at the Control Room. All security related incidents shall be document in the Security Log Event on Table I-8.

Table I-8: Security Occurrence Book / Log Matrix
